### **PART ONE**

### **EXECUTIVE SUMMARY**

In terms of section 227 of the Constitution, local government is entitled to an equitable share of nationally raised revenue to enable it to provide basic services and perform its allocated functions. The local government equitable share is an unconditional transfer that supplements the revenue raised by municipalities (including property rates and service charges). The equitable share provides funding for municipalities to deliver free basic services to poor households and subsidises the cost of administration and other core services for those municipalities that have the least potential to cover these.

The Constitution gives local government substantial own-revenue-raising powers (particularly through property rates and surcharges on services). Municipalities are expected to fund most of their own administrative costs and cross-subsidise basic services for indigent households. The budget must indicate all allocations from made to the municipality through Division of Revenue Act (DoRA).

In view of the aforementioned, the following budget indicators and tables represent a consolidated overview of the proposed 2020/21 Medium-term Revenue and Expenditure Framework for Ngqushwa Local Municipality:
